## Enrollment Station

### Software

#### Biometric fingerprint enrollment for physical access control

The MorphoAccess™ Enrollment Station is a fast, full-featured, and easy-to-use PC fingerprint management solution designed to increase security in commercial physical access control systems. Powered by SAGEM's proven fingerprint identification algorithms known world-wide for speed and accuracy, the software allows you to manage terminal groups, import user ID data, capture fingerprints, check for duplicate records, define individual access options, and upload access data to distributed MorphoAccess terminals through standard Ethernet communications. For added security, you can also write enrollment data to MIFARE® contactless cards and manage card security keys. Plus, convenient system reports keep you informed on the latest server, terminal, database, and group transaction data. The MorphoAccess Enrollment Station is an integral part of SAGEM Morpho's biometric physical access family designed for increased biometric security and tougher protection against unauthorized or fraudulent access.

#### Secure access through terminal group management

- ▶ Create, update, and delete terminal groups
- ▶ Add defined terminals to new or existing terminal groups
- ▶ Name terminal groups by administrator-defined criteria (e.g., zones, offices, facilities, and properties)
- ▶ Assign logical group designators to terminals (e.g., IP address and alpha numeric field descriptions)

#### Save time with fast, easy enrollment management

- ▶ Capture demographic and biometric fingerprint data via MorphoSmart Optic™ or MorphoTouch® fingerprint readers
- ▶ Import existing demographic database records for faster enrollment
- ▶ Configure individual access schedules for each enrollee
- ▶ Search for duplicate records at enrollment (up to 20,000 2-fingerprint records)
- ▶ Upload enrollment data to MorphoAccess™ terminals on demand or through daily processing
- ▶ Grant, limit, or restrict access immediately
- ▶ Write enrollment data to MIFARE® 1K or 4K contactless cards (using the optional ACG CardMan Desktop Card Reader/Writer and contactless cards)
- ▶ Manage MIFARE® contactless card security keys

#### Stay informed with convenient event logging and reporting

- ▶ Capture and retrieves server, terminal, or card reader/writer event logs
- ▶ Maintain logs for terminal identifiers, locations, time-of-day and day of-week events, fingerprint identifications, and access attempts by unidentified fingers
- ▶ Record enrollment events including date and time fingerprint templates are downloaded to terminals
- ▶ Retrieve terminal event logs on request or on a periodic basis
- ▶ Provide at-a-glance reports on terminals including date and time of last database update

#### Minimum System Requirements:

##### Hardware:

- Pentium III, 500 MHz or above (866 MHz recommended)
- 256 MB RAM (512 MB recommended)
- 300 MB free hard drive space
- Network adapter
- One available USB or parallel port (for dongle)
- One available serial port (COM1 or COM2) for optional ACG CardMan Desktop Reader/Writer
- Display resolution 1024 x 768 (minimum)
- USB or parallel port peripheral (dongle)
- Hub

##### Software Platform:

- Microsoft® Windows® NT4.0 Workstation with Service Pack 6 software or Microsoft® Windows® 2000 Workstation with Service Pack 2 (or higher) software

##### Database

- Microsoft® Access 2000 Electronic Database

##### Communications:

- 10baseT Ethernet (for MorphoAccess™ and MorphoTouch®)
- USB (for MorphoSmart Optic™)

##### Reports

- Crystal Reports®
